Technologies used: React, Tailwind CSS , Express.js, MySQL.

Projects

[AI Code Review Tool](#)

React | Express.js | Google Gemini API | Postman

- Developed a full-stack code review app using Google's Generative AI (Gemini).
- Built the frontend with React, featuring a live code editor and JSX syntax highlighting.
- Displayed AI-generated feedback using Markdown for clean and readable output.
- Created an Express.js backend to handle API requests and return structured code reviews.

[URL Shortener](#)

React | Express.js | MongoDB

- Developed a full-stack URL shortener application to simplify long URLs into compact, shareable links.
- Built the frontend using React with a responsive UI and instant redirection preview.
- Integrated Express.js to manage URL shortening, redirection logic, and API endpoints.
- Used MongoDB to persist original and shortened URLs, along with usage statistics.
